

Excellent in Water Transfer and Boosting Applications

Design Features:

- * All ranges of flow and pressure applicable:
Low Flow, Low Head
High Flow, High Head
Variable Flow
Variable Head
Constant Pressure
- * Wide range of materials of construction:
Bronze
Cast Iron
Carbon Steel
Stainless Steel
Duplex Stainless Steel
- * Automatic Pressure Control and Operation
- * Motor Control Center with Protection. IP 55 Enclosures
- * Heavy Duty Pump Skid

Pressure Booster Skids

Applications

- * Water supply to:
Apartment and office buildings
Hotels
Shopping centers
Factories
Greenhouses.
- * Water supply for agricultural use (irrigation systems).
- * Water supply to systems requiring steady pressure
- * Version with variable speed pumps
- * Water supply to fire-fighting automatic sprinkler systems and/or hydrants.
